Synopsis

In the Kingdom of NuvoLandia, the magical parchment that maintains harmony among the seven kingdoms of the Great Universal Kingdom, known everywhere as **Sigillum Maximum**, is destroyed by the mysterious Black Knight. The kingdom and its inhabitants are turned to stone.

The only one to escape the spell is a thirteen-year-old girl: Princess **Aileen**. Thanks to the elves, she discovers that the only way to save her world is to recover the seven magical secrets that, when united, can bring the Sigillum back to life.

Inexperienced and frightened, but driven by the desire to free her people and avert catastrophe, Aileen sets out on an extraordinary journey accompanied by the young warrior **Dorcha** and the valiant orc-troll **Grogher**. Traveling through kingdoms populated by elves, gnomes, sirens, fairies, goblins, orcs, and trolls, the three friends face increasingly difficult trials, challenging not only the dangers of the world but also themselves.

As time runs inexorably and war between the peoples approaches, their mission becomes something more than a simple feat. It becomes the discovery of who they truly are.

Theme

The heart of *Sigillum Maximum* is inner transformation: the journey of two young people who, apparently, seem to embody Good and Evil. But how much good and how much evil coexist in each of us, without either becoming totalitarian?

Just as Aileen is a symbol of light and will discover it only through darkness, Dorcha, whose Gaelic name means "dark," will become Glàire, "dazzling." The truth is that we are all one. When something breaks, the only way to rebuild balance is to find oneself again.

The greatest power is not magic. It is the ability to change.

Why This Story Now

In an era marked by increasingly frequent conflicts and deep divisions between peoples, cultures, and worldviews, *Sigillum Maximum* tells a universal truth: the balance of the world is born from individual choices.

The story speaks to new generations, showing that identity, responsibility, and love are not inherited gifts, but inner conquests that require courage, awareness, and freedom. This is not the story of a world saved by war. It is the story of two souls who, by choosing who to become, change the balance of the universe.

The World of the Story

Sigillum Maximum takes place in the **Great Universal Kingdom**, a system composed of seven kingdoms connected by cosmic balances:

- **Nuvolandia** — Moonstone kingdom, immersed among sentient clouds
- **Kingdom of the Green Forests** — Verdant forest inhabited by elves
- **Kingdom of the Two Rainbows** — Steep cliff divided into fourteen villages, seven colors of the sun rainbow, seven of the moon rainbow
- **Dark Marine Abysses** — Kingdom of the sirens, in the depths of the sea
- **Kingdom of the Magic Wings** — Divided between fairies (inner) and goblins (outer)
- **Sliabh Mountain Chains** — Enormous mountain range inhabited by trolls and mountain gnomes
- **Kingdom of the Storm** — Dwelling of the orcs

Each kingdom possesses its own culture, magic, and laws, contributing to create a vast and visually powerful universe.

Tone and Audience

Tone: **epic, symbolic, emotional**. The narrative blends epic fantasy with the coming-of-age novel and a tragic yet luminous love story, all mixed with elements of traditional classical mythology.

Ideal audience: Young Adult / New Adult, readers of epic fantasy, cinematic audiences who love fantasy sagas.

Visual Potential

Sigillum Maximum possesses strong visual potential for cinematic adaptations, fantasy series, and animated productions, as well as for transmedia developments such as video games, anime, manga, donghua, and webtoon.

- Seven kingdoms with different aesthetic and environmental identities
- Magical creatures: elven narwhals, unicorns, giant winged lions, flying horses, dragons, Mountcur, and griffins
- Great battles between armies composed of different races
- Magic not as a special effect, but as a manifestation of the characters' interiority: it changes shape, color, and intensity

depending on who uses it and how well they truly know themselves

- Symbolic transformations of the protagonists reflecting their inner journey
- Original cultural elements, such as the gnomes' Palla-fiocco game, with a regulation already defined within the narrative world

The story structure, based on the progressive search for the Seven Magical Secrets, also offers a solid episodic base ideal for international fantasy series or fantasy drama adaptations, allowing each kingdom and each trial to be developed as an autonomous narrative arc.

Main Characters

Aileen — Princess of Nuvolandia. Courageous, impulsive, and endowed with an enormous heart. Her journey transforms her from a child to the savior of her world.

Dorcha / Glàre — Warrior raised among the orcs. Convinced he is destined for evil, he passes from Dorcha (Gaelic: "dark") to Glàre ("dazzling") in a fierce battle against himself.

Grogger — Orc-troll with a pure heart, with a dramatic story behind him. He is convinced he has no chance of being loved. Valiant, faithful, paternal, loyal, he becomes a symbol of the highest possibility of redemption.

Fheall, Baelkers, Aeltiàfisar — A gnome and two elves. Three powerful mages, three valiant and elderly commanders known to the world as the three Knights of the Golden Light. Astride their dragons, they demonstrate the importance of knowledge and experience.

Universal Themes

- The search for one's own identity
- The conflict between destiny and free will
- The transformative power of love
- Sacrifice
- The balance between good and evil
- Responsibility toward the world

Sigillum Maximum speaks of what makes any story universal: the need to know who one truly is, and the discovery that the answer is never what we were taught. None of the protagonists is what they believed themselves to be — and the journey they undertake is not only geographical, but inner, fierce, and necessary.
