Logline & Synopsis

When the ancient seal that maintains the balance between the seven kingdoms of the Great Universal Kingdom is destroyed, a thirteen-year-old princess, a young warrior, and an orc troll embark on a journey fraught with obstacles and discover that to save the world, courage is not enough.

In the Kingdom of **Nuvolandia**, the magical parchment that maintains harmony among the seven kingdoms of the Great Universal Kingdom, known everywhere as

Sigillum Maximum, is destroyed by the mysterious Black Knight. The kingdom and its inhabitants are turned to stone.

The only one to escape the spell is a thirteen-year-old girl: Princess **Aileen**. Thanks to the elves, she discovers that the only way to save her world is to recover the seven magical secrets that, when united, can bring the Sigillum back to life.

Inexperienced and frightened, but driven by the desire to free her people, Aileen sets out on an extraordinary journey accompanied by the young warrior **Dorcha** and the valiant orc-troll **Grogger**. As time runs inexorably and war between the peoples approaches, their mission becomes the discovery of who they truly are.

Theme & Relevance

The heart of **Sigillum Maximum** is inner transformation: the journey of two young people who, apparently, seem to embody Good and Evil. But how much good and

how much evil coexist in each of us, without either becoming totalitarian?

CENTRAL QUESTION: Are we truly free to decide who we become, or are we prisoners of the destiny others have written for us?

Just as Aileen is a symbol of light and will discover it only through darkness, Dorcha, whose Gaelic name means "dark," will become **Glàire**, "dazzling." The truth is that we are all one. When something breaks, the only way to rebuild balance is to find oneself again.

In an era marked by increasingly frequent conflicts and deep divisions between peoples, cultures, and worldviews, this story tells a universal truth: **the balance of the world is born from individual choices**. Identity, responsibility, and love are not inherited gifts, but inner conquests that require courage, awareness, and freedom.

The Seven Kingdoms

Sigillum Maximum takes place in the Great Universal Kingdom, a system composed of seven kingdoms connected by cosmic balances:

- **NUVOLANDIA** — Moonstone kingdom, immersed among sentient clouds
- **GREEN FORESTS** — Verdant forest inhabited by elves
- **TWO RAINBOWS** — Cliff divided into fourteen villages, seven sun + seven moon colors
- **DARK ABYSSES** — Kingdom of the sirens, in the depths of the sea
- **MAGIC WINGS** — Divided between fairies (inner) and goblins (outer)
- **SLIABH MOUNTAINS** — Enormous range inhabited by trolls and mountain gnomes
- **STORM KINGDOM** — Dwelling of the orcs, rocky and tempest-swept

MAGIC SYSTEM

Magic is not a special effect but a manifestation of interiority. It changes form, color, and intensity based on who uses it and how well they truly know themselves. The Sigillum Maximum itself is the visual representation of cosmic balance.

THE SEVEN SECRETS

Each secret represents a truth essential to maintaining balance. The progressive search offers a solid episodic base, allowing each kingdom and trial to be developed as an autonomous narrative arc.
